President lickinley Has Decided to Issue a Call for Volun-teers for Manila.

MAY POSSIBLY NEED 12 REGIMENTS.

Gen. Otis New Has 25,000 Regular and There Will Shortly Be a Reinforcement of 7,000.

Actual Enlistment for the New Vol-onteer Regiments Will Be Under the Army officers—The Unit to Be Issued in a Few Days.

CHICAGO, June 28.—A special dispatch from Washington says:
President McKinier has decided to call for rotunters for service in the Philippines. It has been determined to form at least nine regiments, and possibly 12.
For the present the president deems nine or ten regiments enough and it; bunderstood this number le based on the representations made by Gen. Otts. who is said to have recently amended his estimate of the force he will need in maintaining peace in the islands. There are now 25,000 regulars in the Philippines and there will altority be a Philippines and there will altority be the standard of the force of the standard from Manilla. Lately, however, the has had occasion to revise these figures, and under the influences of the more -iberal estimates of Gen. Lawton and other advisers he has informed the Washington officials that the presence of 12,000 or 13,000 rolunteers to supplement the force of regulars will be a safeguard.
Actual collisioners for the new volundards.

feguard.

Actual enlistment for the new voluner regiments will be under the army
fleers and the records will be similar
those which attended the recruiting to those which attended the recruiting of volunteers at the outbreak of the late war. It is probable the company strengtl will be maximum, and this would give for nine regiments a volunteer force of at least 12,000. The call for troops will be sawed as soon as the necessary arrangements for recruiting system can be made.

This is now shown to have been a to-tally erroneous theory, for the naphtha tank was discovered by Capt. Doublett inact and uniqured and still three-fourths full at Grand Gazier Island, near lireton Island, where the wreck was supposed to have occurred. The tank was brought to the city. Some 12 feet of the launch was still aldering to it and seemed to have been cut off. Indicating that the vessel was run down in a collision. On the other hand, the accident occurred where no large ressels go, and a collision was well nigh lapossible. The remainder of the wreck will be brought to New Orleans from Grand Ganier on the next trip of the Independence. trip of the Independence.
